Work Experience

Ericsson
Genoa, Italy

Software Designer — *Feb. 2022 - Present*

- Designed, implemented and maintained Java components within Ericsson's Optical Fronthaul platform, delivering 10+ major features and resolving 20+ critical defects while evolving a large production codebase supporting both legacy and next-generation device models. Technologies: Java, Groovy, OSGi, Gradle, Git, Docker, ConfD.
- Developed and enhanced Java Spring Boot microservices for Ericsson's 6G network controller, contributing to the testing and validation of advanced next-generation networking features while improving system reliability and maintainability.
- Refactored existing Java components and automated development workflows to improve maintainability, reduce manual effort, and streamline release activities. Built automation tools in Java, Python and Groovy that reduced documentation effort by 95%, increased team productivity by 30%, and received the Ericsson R&D Italy Most Impactful Project 2025 award.
- Designed and developed a cross-platform Flutter application, implementing the complete user interface and application workflow for Bluetooth Low Energy communication with telecom devices. The solution enabled remote log retrieval and diagnostics, reducing troubleshooting time by approximately one hour per incident.
- Collaborated within an Agile distributed team, participating in feature design discussions, peer code reviews, issue tracking, and Git-based development workflows.

Leonardo
Genoa, Italy

Software engineer intern — *Mar. 2021 - Dec. 2021*

- Collaborated with 3 senior software engineers to design and develop a cloud-based technological scenario utilizing Kubernetes, Docker and Ansible, showcased as a master's thesis project, and subsequently integrated into Leonardo's Cyber Range.
- Enhanced proficiency in cloud computing by constructing a simulated Amazon Web Services (AWS) environment, thereby achieving a deeper understanding of cloud infrastructure.
- Actively engaged in hands-on cyber security initiatives, leveraging expertise to emulate vulnerabilities sourced from the Common Vulnerabilities and Exposures (CVE) database. Conducted thorough penetration tests on applications deployed within the simulated Amazon Web Services environment, fortifying security measures and ensuring robust protection against potential threats.

University of Genoa
Genoa, Italy

Tutor — *Jul. 2019 - Jul. 2021*

- Coordinated communication with more than 200 incoming freshmen students to ensure an efficient onboarding process.
- Succeeded in increasing the number of new enrollments in the computer engineering faculty by 8% compared to the previous academic year.

Personal Projects

FitTracker

Google Play Store | Website

- Designed and developed a **Cross-platform Flutter Mobile Application** featuring responsive user interfaces and AI-powered computer vision for real-time exercise analysis. Key features include precise exercise tracking, form correction guidance, and automatic repetitions counting, allowing users to optimize their workouts and minimize the risk of injury.

Education

University of Genoa
Genoa, Italy

Master's degree in Computer Engineering (MSc) — *Graduated with Honors, Dec. 2021*

- Main Courses: Computer Security, Artificial Intelligence, Distributed Systems, Software Engineering, Operations Research, Virtualization and Cloud Computing, Data Protection and Privacy.

University of Genoa
Genoa, Italy

Bachelor's degree in Computer Engineering (BSc) — *Oct. 2019*

- Main Courses: Data Structures & Algorithms, Databases, Operating Systems, Linear Algebra, Calculus and Analysis, Computer Architecture, Programming Fundamentals.

Skills

Programming	Java, Python, Dart, Groovy, SQL
Frameworks	Spring Boot, Flutter, Unit Testing
Platforms & DevOps	Docker, Kubernetes, Ansible, Jenkins, CI/CD
Web Technologies	REST APIs, HTML5, CSS, JavaScript
Databases	MySQL, Firebase
Languages	English, Italian, Albanian
